DESIGNER DOOR HARDWARE FROM THE UK

JOSEPH GILES

Exquisite Functionalism

Hello,

I'm John, the founder of Joseph Giles.

Twenty years ago, I started a hardware business named after my two sons. I had one simple desire: to say 'yes we can' to the ideas and dreams of designers and clients like you.

It hasn't always been easy - some of the designs we work on are formidably tricky, but the end result is always worth the effort.

Because we know you care about the detail and finish, we hold ourselves to incredibly high standards, spending hours redesigning components until we reach perfection.

I hope you get the chance to try our creations for yourself one day - I have a feeling you'd appreciate them.

Yours ever,

A handwritten signature in black ink, appearing to read 'John Harwood', followed by two dots. The signature is stylized with loops and a long horizontal stroke.

John Harwood
Founder, Joseph Giles

ASHWORTH

The 'Ashworth' collection pays homage to the form and function of the Bauhaus movement.

Its founder, Walter Gropius, designed a lever handle in the 1920s which epitomises Bauhaus principles, and remains a popular choice in design schemes today.

BARTLETT

Circles have played an important part in architecture across many different buildings, and in many different forms. Whether it be a domed roof, circular window, ceiling rose, or an arched doorway, the list goes on.

With the 'Barlett' range, we've sought to subtly harness the beauty of simple concentric circles in a contemporary way.

FONTEYN

The slender form of the 'Fonteyn' follows the uniquely distinctive lines of a handle designed by Italian architect Gio Ponti. As beautiful as the original handle was, the size did not suit many of the modern-day door proportions.

The delicate form and perfect balance are synonymous with that of a ballerina, hence this design is fittingly named after Margot Fonteyn.

	<p>LV1045.01.PR</p> <p>'FONTEYN' Pair of solid brass lever handles with round rosettes</p> <p>O/A L: 140mm Proj: 62mm Rose: 52mm</p>

HAMMERED

The Joseph Giles Hammered texture is inspired by the sculptured shapes that the waves create on objects like driftwood, stones and sand.

It is produced using traditional blacksmithery methods. The process cannot be hurried, and particular attention has to be paid to the pressure applied.

	<p>LV1047.01.PR</p> <p>'ROLLED & HAMMERED' Pair of solid brass lever handles with round rosettes</p> <p>O/A L: 151mm Proj: 64mm Dia: 52mm</p>

MONTGOMERY

The 'Montgomery' collection was born from the appreciation of the original Walter Gropius handle; a design Joseph Giles have always admired for its simple and solid grip.

The collection is also available with Linear Knurl or Diamond Knurl detailing.

EDGE PULLS

Edge Pulls can be fitted to a cabinet door or drawer as an elegant alternative to a knob or handle.

Joseph Giles cabinet edge pulls range from 50 to 1000mm in length while their door edge pulls are from 150 to 1000mm long. Profiles range from flat, curved, cube, round or moon.
